

Guide for reviewers & judge

AS REVIEWERS:

Open the **main category/ conference event** by clicking on the event title.

For example: Click on the “[Demo] 🍀 International Conference on Artificial Intelligence & Internet of Things (AI & IoT)” to access the event page.

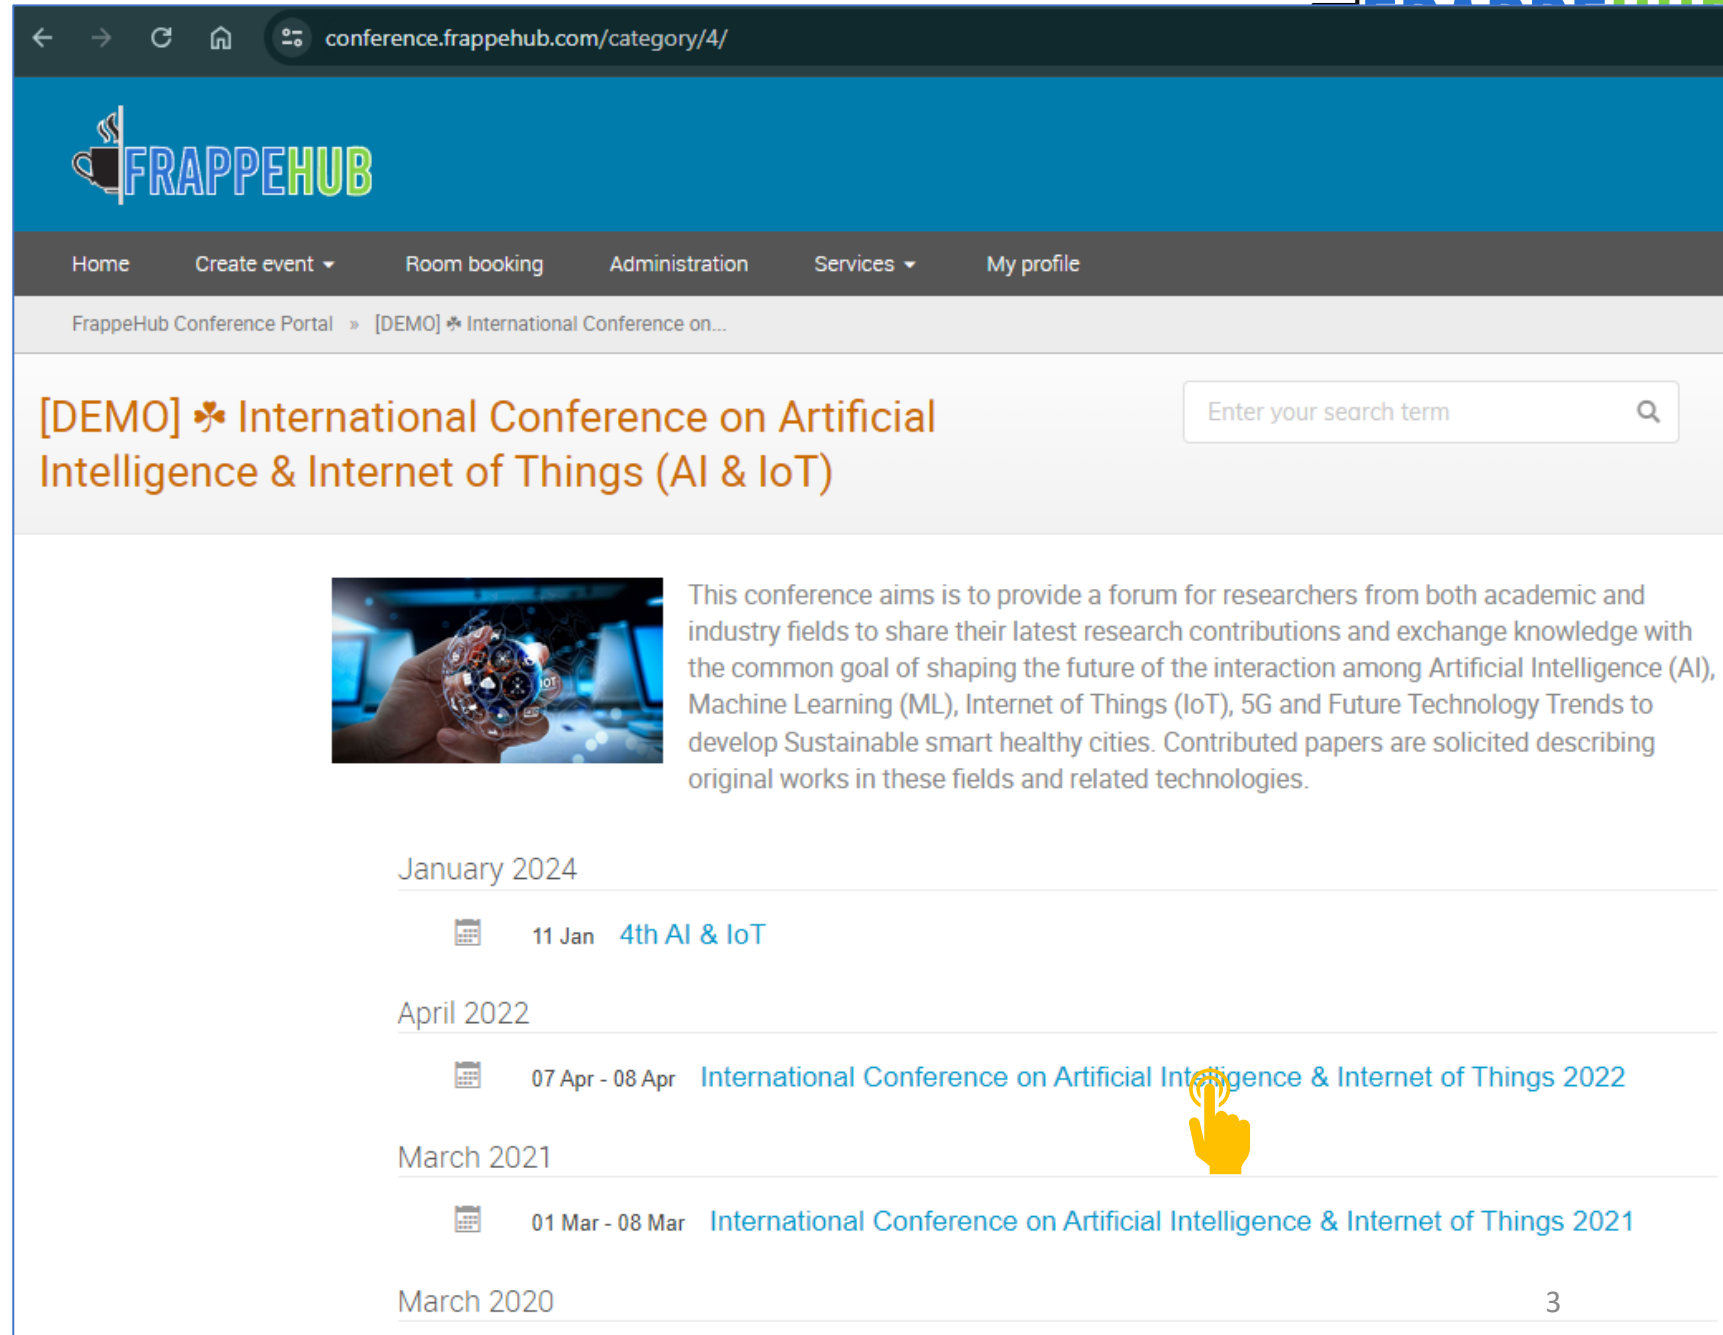

The screenshot shows the FrappeHub Conference Portal website. The header includes the FrappeHub logo and navigation links: Home, Create event, Room booking, Administration, Services, and My profile. The main content area displays the 'Upcoming Events' section, which lists several events. A yellow hand icon points to the event '[Demo] 🍀 International Conference on Artificial Intelligence & Internet of Things (AI & IoT)', which has 4 events listed. The footer includes the FrappeHub logo, the text 'Powered by FrappeHub v3.2.9', and links for Help, Contact, Terms and conditions, and Privacy.

Event Title	Number of Events	Action
2024 IEEE 1st International Conference on Communication Engineering and Emerging Technologies (ICoCET)	1 event	⇒
International Conference on Sustainable Energy and Environmental Technology for Circular Economy (SEECE)	1 event	⇒
International Symposium on Intelligent Manufacturing and Mechatronics (SIMM)	1 event	⇒
International Conference on Biomedical Engineering and Bioscience (ICOBEB)	empty	⇒
[Demo] 🍀 International Conference on Artificial Intelligence & Internet of Things (AI & IoT)	4 events	⇒
International Workshop	1 event	⇒
Lecture Series	2 events	⇒
Trainings & Workshops	2 events	⇒

AS REVIEWERS:

Open the **sub-category/sub-conference event** for the specific series/year

e.g. **International Conference on Artificial Intelligence & Internet of Things 2022**

The screenshot shows a web browser at the URL `conference.frappehub.com/category/4/`. The page features the FrappeHub logo and a navigation bar with links: Home, Create event, Room booking, Administration, Services, and My profile. Below the navigation bar, the breadcrumb trail reads "FrappeHub Conference Portal » [DEMO] ✳ International Conference on...". The main heading is "[DEMO] ✳ International Conference on Artificial Intelligence & Internet of Things (AI & IoT)". A search bar on the right contains the placeholder text "Enter your search term".

An image of a hand holding a glowing sphere with various icons is displayed next to a paragraph describing the conference's purpose: "This conference aims is to provide a forum for researchers from both academic and industry fields to share their latest research contributions and exchange knowledge with the common goal of shaping the future of the interaction among Artificial Intelligence (AI), Machine Learning (ML), Internet of Things (IoT), 5G and Future Technology Trends to develop Sustainable smart healthy cities. Contributed papers are solicited describing original works in these fields and related technologies."

The page lists several events:

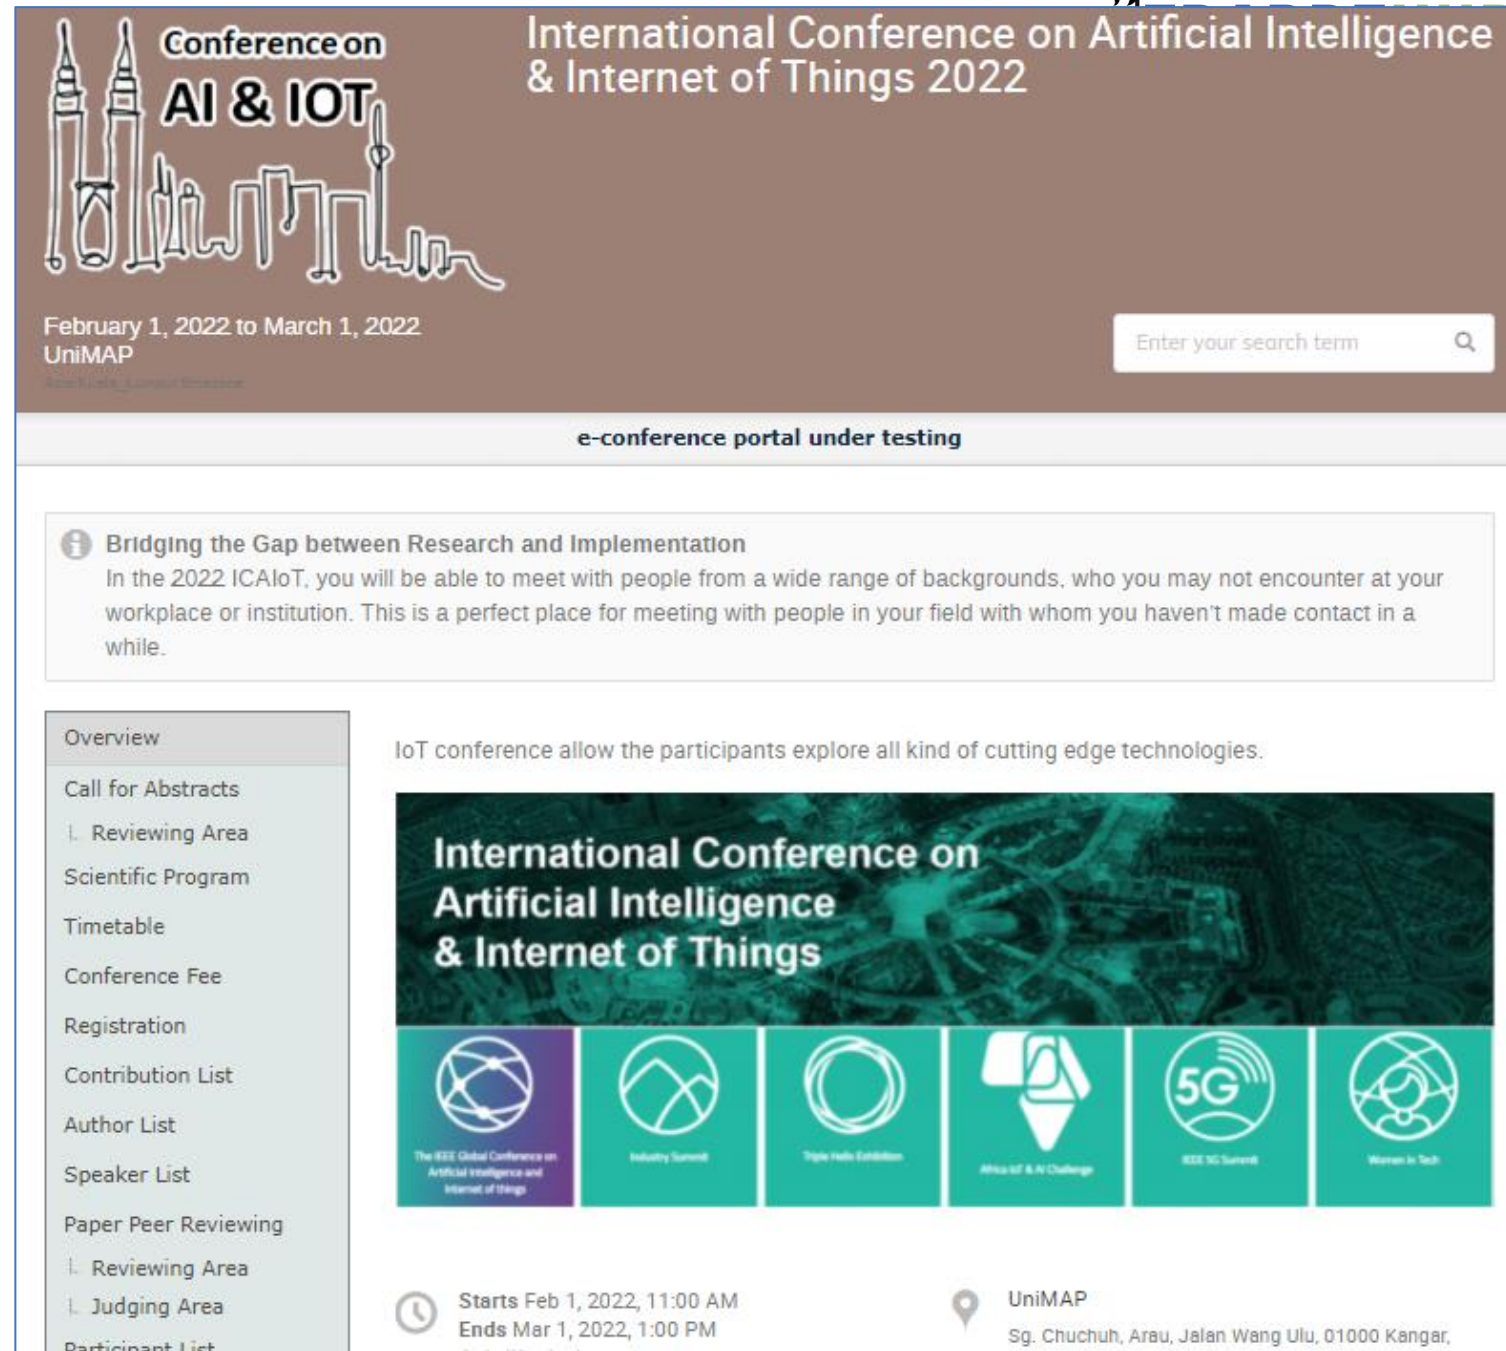

- January 2024**
 - 11 Jan 4th AI & IoT
- April 2022**
 - 07 Apr - 08 Apr International Conference on Artificial Intelligence & Internet of Things 2022
- March 2021**
 - 01 Mar - 08 Mar International Conference on Artificial Intelligence & Internet of Things 2021
- March 2020**

A yellow hand icon is pointing at the "International Conference on Artificial Intelligence & Internet of Things 2022" event. The page number "3" is visible in the bottom right corner.

AS REVIEWERS:

You will be directed to the Conference page. For example:

International Conference on Artificial Intelligence & Internet of Things 2022

The screenshot displays the official website for the International Conference on Artificial Intelligence & Internet of Things 2022. The header features a stylized line-art logo of a city skyline on the left, with the text "Conference on AI & IOT" and "International Conference on Artificial Intelligence & Internet of Things 2022" to its right. Below the logo, the dates "February 1, 2022 to March 1, 2022" and the location "UniMAP" are listed. A search bar is positioned on the right side of the header. A banner below the header states "e-conference portal under testing". The main content area includes a message titled "Bridging the Gap between Research and Implementation" and a list of navigation links on the left. The right side of the main content area features a large banner with the conference title and a row of six icons representing various conference activities. At the bottom, the start and end times are provided, along with the location "UniMAP" and its address.

IoT for climate change #10

Withdraw

Accepted

participant one submitted this abstract and it was finally accepted for track AI and Machine Learning in En... as Oral.

Go to contribution

Author: participant one

UK environmental organizations currently face a significant funding gap. It is well-established that representations of individual victims are more effective than abstract concepts like climate change when designing fundraising campaigns. This study aims to determine how such representations can be better targeted in order to increase donations. Specifically, it investigates whether the perceived social distance between victims and potential donors has an impact on donation intention. In this context, social distance is defined as the extent to which people feel they are in the same social group (in-group) or another social group (out-group) in relation to climate change victims.

Q

Content

Proposed to **accept** - score **3.83** (hide ratings)

1	Originality & Novelty: Please rate the originality and novelty of the work presented in the paper.	★★★★★	4
2	Significance & Impact: Please rate the likely significance and impact of the paper on the research community of the field/area.	★★★★★	4
3	Technical Quality & Correctness: Please rate the technical quality of the paper in terms of soundness, correctness and scientific rigour.	★★★★★	4
4	Clarity of Presentation: Please rate the quality of the paper presentation, including the clarity of writing, paper organisation, and other stylistic aspects of the paper.	★★★★★	4
5	Reviewer's Comments to Authors: Please highlight the major strengths and weaknesses of the paper, and provide detailed constructive criticism.		

1. This paper Investigates on tibia bone segmentation from the Osteogenesis Imperfecta Images using Deep Convolutional Neural Network (DCNN). 2. The paper seems did not follow IFMBE Conference Proceedings template. Please check back the template and do amendments accordingly. (I) Paper title should be centered and the font size is 14pt bold. (II) Same goes for 1st heading and 2nd heading as the font is different. (III) The paper margin also looks different from the given template. 2. Suggest to include a table to explain more clearly on data preparation. 3. Results & Discussion: Suggest to include some discussion on IoU to elaborate more on Table 4. Same for Table 5, suggest including some value of Table 5 (performance results in the discussion section- accuracy, precision, recall, and specificity) 4. The rest are good to proceed.

H

Haniza Yazid accepted this paper. - 29 July 2023

Comment

Dear Authors,

Congratulations. Your submission (

However, when preparing your revised/camera-ready paper, you are asked to carefully consider the reviewer's comments. You are requested to submit the "Revised/Camera-ready paper" in the Ms-Word file before 31st July 2023.

Reviewer comments:

Reviewer 1: Authors have Implemented Unet and Resnet for Image segmentation for Osteogenesis Imperfecta (OI) that is a type of genetic bone disease. But authors did not mention how this disease prediction and actual bone fracture is differentiating. Table 2 having Images must be align they are not appearing while accessing the manuscript. Conclusion needs more explanation. dataset is very low for training and testing purpose.

Reviewer 2: 1. This paper Investigates on tibia bone segmentation from the Osteogenesis Imperfecta Images using Deep Convolutional Neural Network (DCNN). 2. The paper seems did not follow IFMBE Conference Proceedings template. Please check back the template and do amendments accordingly. (I) Paper title should be centered and the font size is 14pt bold. (II) Same goes for 1st heading and 2nd heading as the font is different. (III) The paper margin also looks different from the given template. 2. Suggest to Include a table to explain more clearly on data preparation. 3. Results & Discussion: Suggest to Include some discussion on IoU to elaborate more on Table 4. Same for Table 5, suggest including some value of Table 5 (performance results in the discussion section- accuracy, precision, recall, and specificity) 4. The rest are good to proceed.
