FrappeHub Conference Portal

Welcome to FrappeHub

FrappeHub Conference Portal is a conference management system built for authors and organizers.

Upcoming Events

International Conference on Civil and Environmental Engineering (CENVIRON)	4 events	⇒
International Conference on Biomedical Engineering (ICoBE)	1 event	⇒
International Conference on Applied Photonics and Electronics (InCAPE)	1 event	⇒
International Conference on the Roles of the Humanities and Social Sciences in Engineering (ICoHSE)	1 event	⇒
International Conference on Man Machine System (ICoMMS)	8 events	⇒
International Conference on Frontiers of Chemical and Materials Engineering (ICoFCheM)	1 event	⇒
International Conference on Applications & Design in Mechanical Engineering (ICADME)	1 event	⇒
International Conference on Biomass Utilization and Sustainable Energy (IcoBiomasse)	1 event	⇒
International Conference on Applied and Engineering Mathematics (ICoAEM)	1 event	⇒
International Conference on Civil Engineering & Technology (CIVENTECH)	1 event	⇒

About ICoFChem 2023

Advances in the field of materials research have significantly impacted today's technological revolution. The success of discovering functional materials that meet current technical specifications and design has accelerated the technical process. It is essential to align all materials science and technological development activities. Accordingly, common goals in this technological development could be tackled hand-in-hand by cooperation between industry-research institutions.

Therefore, the conference "International Conference on Frontiers of Chemical and Materials Engineering (ICoFChem 2023)" is organized to create a platform for the meeting of researchers, academicians, technocrats and key players to share the knowledge and findings in the related field.

This conference will become an annual event to celebrate the success of scientific research by experts in various collaborations between industry and research institutions across the country and worldwide.
